Field	Term	Ontology Identifier	Definition	Guidance	Deprecated Label	Deprecated ID	Version Tracking		Description/ Guidance	
							Label	ID		
organism										
organism	Severe acute respiratory syndrome coronavirus 2	NCBITaxon_2697049								
organism	Monkeypox virus	NCBITaxon_10244								
reference accession										
reference accession	NC_045512.2									
reference accession	NC_063383.1									
reference database name										
reference database name	RefSeq									
original mutation description										
original mutation description										
nucleotide sequence mutation (symbol)										
nucleotide sequence mutation (symbol)										
nucleotide position										
nucleotide position										
amino acid sequence mutation (symbol)										
amino acid sequence mutation (symbol)										
amino acid mutation alias										
amino acid mutation alias										
gene name										
gene name										
gene symbol										
gene symbol										
protein name										
protein name	spike glycoprotein (SARS-CoV-2)	PR_P0DTC2	A protein that is a translation product of the S gene in SARS-CoV-2.							
protein symbol										
protein symbol										
assay										
assay										
mutation functional effect category										
mutation functional effect category										
mutation functional effect description										
mutation functional effect description										
author										
author										
publication year
